## About us

We are the champions - my friends. And we'll keep on fighting - till the end - We are the champions - We are the champions No time for losers

'Cause we are the champions - of the world - I've paid my dues - Time after time - I've done my sentence But committed no crime - And bad mistakes I've made a few I've had my share of sand kicked in my face - But I've come through

We are the champions - my friends And we'll keep on fighting - till the end -We are the champions - We are the champions No time for losers

'Cause we are the champions - of the world - I've taken my bows And my curtain calls - You brought me fame and fortuen and everything that goes with it I thank you all - But it's been no bed of roses No pleasure cruise - I consider it a challenge before the whole human race - And I ain't gonna lose -

We are the champions - my friends And we'll keep on fighting - till the end -We are the champions - We are the champions No time for losers

'Cause we are the champions - of the world -

## Viewshape for iPhone

## Real 3d model viewer for iPhone & iPod touch

Viewshape is a novel 3D model viewing application designed for iPhone & iPod touch.

It lets you view 3D models of real scanned objects or 3D models created by artists in modeling software. You can save models you like in the gallery and share models with your friends, customers and colleagues. You may download models directly from the Web, upload them with iTunes or open them from other applications.

A wide range of 3D file formats are supported.

[f viewshape on Facebook](#)
[t viewshape on Twitter](#)

### Key Features:

- Easy and intuitive view navigation
- OBJ, STL, VRML and PLY formats support
- Support for textures
- Many different modes of rendering including solid, wireframe and points
- Download models from the web or open them from other applications (i.e. Mail.app)
- Built-in gyroscope and accelerometer support
- Full screen mode
- Share links to models with friends

## Viewshape for Windows

Support for STL, OBJ, WRL & PLY formats  
Open files in widely used industry standard formats

NVidia 3DVision Pro stereoscopic rendering support

Use your NVidia Quadro graphics card with stereo-ready display or projector and Artec 3DViewer to get a fully-immersive 3D environment

Simple editing operations

Edit your models right in the viewer: basic operations such as erasing/smoothing and moving objects around are supported now

Support for texture

See your models with texture mapped on them - png, jpeg and bmp files are now supported

Fast rendering for big data-sets

Load big objects or many small objects into Artec 3DViewer - it'll handle all of them. 64x bit version will soon be available making it even better suited for opening and viewing big 3D models
